PT-51 MANIKIN DROP SYSTEM

Reactive Live-Fire Manikin Mike™ Training systems

ATS' live-fire PT-51 hit-reactive target simulation system. This system is designed for use with Manikin Mike ("Mary") for greater training realism. **Free-standing** target utilizing the same manequin, hit sensor/count system as the M-145 training robot.

The PT-51 target system features:

- Portable; overhead deployable; heavy duty.
- Electronic hit-sensors.
- Built in, programmable electronic hit counting system.
- Animated movements; life like target figures collapse upon being hit by the appropriate number of rounds in the "kill zone".
- Low cost; very affordable.

DD-10 MANIKIN DROP SYSTEM

Reactive Live-Fire Manikin Mike™ Training systems

ATS' live-fire DD-10 "drop-down" hit-reactive target simulation system. This system is designed for use with Manikin Mike ("Mary") for greater training realism. **Window or door mounted** and utilizing the same manequin, hit sensor/count system as the M-145 training robot.

The DD-10 target system features:

- A portable, self-contained ceiling mounted stand alone collapsible 3D target.
- DD-10 targets can be mounted in ceilings, on side walls, door frames, window frames and parapets.
- Lifelike 3D human targets collapse upon being hit.
- Built in programmable hit counting system, featuring ATS' exclusive thin film hit sensing system.
- No external remote controls required for operation.
- COTS product.
