

DRS SERIES

Product Overview

Range Systems is launching the DRS Series of Deployable Range Systems, featuring portable, pop-up, programmable targets along with chargers, accessories, and peripherals. Designed for versatility, these systems enable agencies to rapidly set up dynamic training environments in almost any location. Compact and easily transportable, they adapt seamlessly to evolving training needs.

DRS-1

This 10' BICON-style shipping container comes equipped with 24 standard targets, target containment, built-in chargers, and a side-mounted tool chest for storing accessories and tools, along with ample space for additional training equipment. Designed for outdoor storage, the watertight container includes everything needed for rapid deployment and training. It features a 120VAC 30A sub-panel with an exterior shore power outlet, powering two circuits—one for lighting and another for wall outlets on both sides of the container. Additionally, the system includes target racking with integrated charging cables for each target slot, quick-lock latches for secure placement, and a roller door to retain targets during transport.

Package Contains:

*Custom packages available upon request.

ITEM	DESCRIPTION	QUAN*
Pro-SIT or Pro-SIT 360	Pop-up, Hit-reactive, portable, programmable target	24
TARGET RACK	Target racking for up to 24 Pro SIT Series targets	1
CHARGERS	10 Station Charger with cables to each storage slot	2
LAPTOP CONTROLLER	PC Laptop with Range Systems UTC Software	1

FIRE EXTINGUISHER	ABC Fire Extinguisher	1
BICON 10' CONTAINER	10' Shipping container with doors on one end.	1
TOOLKIT	Toolkit for all minor adjustments to targets and peripherals.	1

DRS-2

This 20' shipping container is equipped with 48 standard targets, target containment, built-in chargers, and a side-mounted tool chest for storing accessories and tools, along with ample space for additional training equipment. Designed for outdoor storage, the watertight container provides everything needed for rapid deployment and training.

The standard container includes a 120VAC 30A sub-panel with an exterior shore power outlet, supplying two circuits—one for lighting and another for wall outlets on both sides. It also features target racking with integrated charging cables for each target slot, quick-lock latches for secure placement, and a roller door to retain targets during transport.

Package Includes:

*Custom packages available upon request.
